

VAP

IS A TOUGH ENEMY.

Are you doing all you can to ZAP VAP®?

You are when you add the *Mallinckrodt® Hi-Lo Evac®* endotracheal tube to your arsenal of VAP interventions.

Clinical studies show hospitals that added the *Hi-Lo Evac* tube to existing VAP intervention efforts, such as head of the bed elevation and regular oral care, realized **additional** VAP rate reductions up to **74 percent***. Continuous aspiration of subglottic secretions (CASS) with the *Hi-Lo Evac* endotracheal tube is clinically proven to significantly reduce VAP – a claim no other endotracheal tube can make.

Need more proof? Call 1-800-NELLCOR or go to www.ZAPVAP.com to read published VAP guidelines and improvement stories using the *Hi-Lo Evac* endotracheal tube.
